COURSE INFORMATION

- Credits: 4 SWS / 6 ECTS
- Course Level: Master
- Course format: Lecture & Exercise
- Language: English
- Where: L.1.10 (Bildungscampus 9) Lecture
L.1.10 (Bildungscampus 9) Exercise
- When: Tuesday, 10:15 – 11:45 Lecture
Wednesday, 10:15 – 11:45 Exercise
- To get Moodle access, registration for lecture and exercise is necessary.

- **Grade composition: 100% written final exam** (multiple choice, 120min, closed-notes, formulary provided)
- **Exam date: August 3rd, 2026 at 08:30-10:30**
- **All Lectures (Corporate Finance) and Exercises (Mathematical Basics in Finance)** will be relevant for the exam.
- Remember to register for the exam on time via TUMonline!
- Take a proof of identity with a photo (ID, driver's license) as well as a proof that you are enrolled as a student at Technische Universität München to the exam.
- Auxiliary means: Non-programmable calculator and a non-electronic dictionary. In addition, a formulary will be provided during the exam.

This course consists of the lecture in corporate finance and the exercises on mathematical basics.

- The lecture in corporate finance: Broad overview of financing instruments for corporations, the instruments to evaluate investment opportunities, and the functioning of financial markets.
 - Exercise on mathematical basics: Active and practical use of mathematics in finance, with particular focus on the calculation of interests and valuation of financial instruments.
- By integrating these components, this course aims at providing a comprehensive and well-rounded learning experience in finance!

Lecture in Corporate Finance

- Content:
 - Financial Statement Analysis (balance sheet analysis, analysis of profit and loss account)
 - Investment Analysis (net present value method, internal rate of return, other methods)
 - Capital Budgeting (determination of free cash flows, choosing between alternatives)
 - Cost of Capital (equity costs, borrowing costs, weighted average cost of capital)
 - Capital Structure (including influencing factors and the importance of taxes)
- Goals:
 - Obtain a comprehensive overview of the tasks and aims of the Finance departments of corporations
 - Differentiate between the main financial instruments (stocks, bonds, ...) and funding options of a firm
 - Be able to evaluate investment opportunities and understand companies' investment decision-making processes, as well as capital budget plans
 - Understand the basic functioning of financial markets
 - Understand the main concepts and theories in (corporate) finance, e.g., time value of money, the relation between risk and return, capital structure policies, etc.

Exercise on Mathematical Basics

- Content:
 - Interests (simple interest, compounding interest, continuous interest)
 - Annuities (annuities due, annuities immediate) and redemptions
 - Bonds (concept, pricing, valuation)
 - Stocks (concept, pricing, valuation)
 - Options (concept, valuation)
- Goals:
 - Understand the concepts in financial mathematics
 - Understand the valuation of financial instruments as they relate to financial mathematics
 - Introduce the use of mathematical models for financial products
 - Develop abilities to create and apply mathematical models

Important note: The exercise content is independent of the lecture, i.e., the exercise does not build on the lecture!

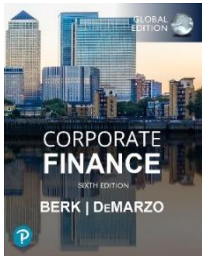

TUMonline

- Course registration
- Exam registration (mandatory!!!)
- <https://campus.tum.de/tumonline/>

Moodle platform

- Syllabus and Lecture notes
- Course communication tool for students (not for lecturers)
- <https://www.moodle.tum.de/>

Textbook

- Berk, J./DeMarzo, P. (2024): Corporate Finance, 6th edition, Pearson.
- Available online via eAccess in TUM library

Tumtutor.ai

- AI-supported learning platform with context information and some quizzed

Moodle platform

- Please note that all material relating to the lecture in corporate finance and the exercise on mathematical basics will be posted in the lecture in Moodle (see Investment and Financial Management (WIHN1138) MiM Heilbronn - Lecture).

~~Investment and Financial Management (WIHN1138) MiM Heilbronn - Exercise~~
(SoSe 2026 | Management)

Investment and Financial Management (WIHN1138) MiM Heilbronn - Lecture
(SoSe 2026 | Management)

- The Q&A Forum is your place to ask questions about lecture and exercises
- Students are encouraged to answer: Use the forum to learn by explaining (peer-to-peer learning)

Rules for the Q&A Forum

- All forum entries need to follow the naming convention

L/T_SESSION_SLIDE-NUMBER_QUESTION/SUBJECT

- Examples: Lecture_Session01_Slide44_Example2,
Exercise_Session02_Slide12_ExerciseA.11
- Explain the problem well and ask a specific question

What is it?

- AI-based learning assistance platform
 - “Chat with the course material”
 - Take quizzes created by AI (with instructor supervision)

Benefits

- Low barrier to asking questions; instant responses
- We get access to:
 - Anonymized chat messages and frequently inquired into topics
 - Common mistakes in the quizzes
- Helps us improve our teaching and your learning experience

Limitations

- Training data includes transcripts and slides from prior semesters
 - Information on dates and contact persons can/will be wrong
- Generative AI can make mistakes
 - There is a feature for you to give feedback on the AI's responses, which we can review and evaluate. This helps us improve the chat experience over time. If you receive a questionable answer, please use this feature.
- Quiz questions are not necessarily representative of the exam questions
 - They are only meant to test and reinforce your general understanding
 - They are under constant development and only cover limited topics to this point
- Answers may be based on material covered in future lectures or exercises
